## Education

California State University - Fresno, CA USA

Master of Science (M.S.)

Aug 2021 - Dec 2023

Major in Computer Science

Sant Longowal Institute of Engineering & Technology, India

Bachelor of Engineering(B.E.)

Aug 2014 - May 2018

Major in Computer Science

## Work Experience

Pre-Fab Innovations, Inc

CA, USA

Machine Learning Engineer

Jan 2024 - Present

- Optimizing the existing doc based **LLM model** with **parameter-efficient-fine-tuning** combined with quantization and LoRA, designed for filtering construction codes from official documents.
- Using LlamaIndex for loading and indexing the structured and unstructured data from multiple sources into a knowledge base db.
- Working on designing model training and inference generation **pipeline** on inhouse servers and **migrating** the current flow to **AWS sagemakers** flow.
- Conduct weekly intra-team research discussion to explore new technologies in Machine Learning, vLLM and their implementation in our on-going products.
- Collaborating with team members in developing day-to-day business requirements and working on **developing data load Rest API's** for in-house **progress dashboard systems** using PHP, JavaScript.

Paytm

Delhi, India

Software Engineer

Sept 2019 - Aug 2021

- **Resolved production alerts** for increase in payment gateways response time, system overload, system downtime.
- Designed a **Rest API's** for run-time distributed caching reload on production servers, **managed production releases**.
- Wrote **mockito based automation code** following **TDD approach** with detailed documentation using swagger.
- Collaborated with cross-functional teams(QA , Product) to develop application business features, assist teams in UAT.

Zillious Solution Pvt Ltd

Delhi, India

Technical Associate

June 2018 - Sept 2019

- Worked on **full-stack development** of Bus **B2B booking product**, integration of **Swagger** for system-wide API's **documentation**.
- Collaborated with the expense management team to **develop** a **microservice for deep learning OCR** parsing model. which **impacted** in enhancing B2B expense **operational efficiency by 40%** and an **accuracy of 97%**.
- **Revamped** the complete frontend for **the search result page** to single page search result.

## Projects

Thesis - M.S |Computer Science - CSU Fresno | ([Thesis-Link](#))

**Topic:** Blindfolded Spider-Man Optimization: A Single-point Metaheuristic Suitable for Continuous and Discrete Space

- **Developed a new metaheuristic algorithm** using **memoization concept** in higher dimensions.
- Researched on unbounded knapsack discrete problems and applied metaheuristics to achieve the most optimum. result following several higher dimensional **implementations ranging from 2-Dimension to 20-Dimensions**.
- **Data analysis** on statistical significance tests like shapiro-wills, kruskal-wallis, converse tests with **0.05 p value**.
- All experiments run on **Linux containers** on **AWS-EC2 instances**.

Tugposts, WebApplication on AWS-EC2 | [tugposts.com](https://tugposts.com)

- An initiative to create a central tech content **open source directory**, **hosted on AWS-EC2** using MySQL DB and designed on **Spring Boot Framework** using **Java** with complete **SSL encryption** done on EC2

Non-Convex Optimization Opensource Python Package | [pypi.org](https://pypi.org) | [GitHub](#)

- Python package **published on pypi.org** providing a collection of non-convex functions for testing and benchmarking optimization algorithms, written in Python and **install using pip** command

DATS-Data Analysis Through Synthesis | [GitHub](#)

- Personal data analytics tool developed using **Python Flask Rest API's** using **Langchain,OpenAI embeddings** and **OpenAI Gpt-4** text summarization. Use **DuckDB for in-memory storage** and give **analysis on user social-media activity** by feeding data as CSV.

## Technical Skills

Data Structure, Python, Java, AWS services, Object Oriented Programming ,GenAI Frameworks, LangChain, PyTorch, Huggingface-Transformer, Deep Learning Models, LLMs Modeling, Fine Tuning, Prompt Engineering, Jupyter Notebook, SQL, RDBMS, NLP, Redis, GitHub Actions SpringBoot, Agile Development, Rest API's, SDLC, JavaScript, Tomcat, Docker.
